

# PointLock MDM

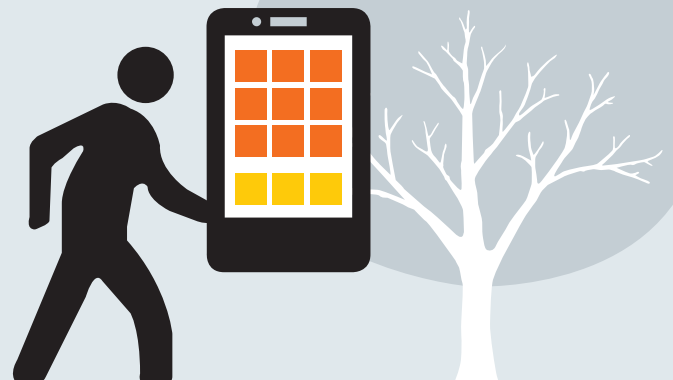

## Mobile Device Management Solution

PointLock MDM is mobile device management solution that can secure, maintain, manage the whole device for Smart Work and Smart School.

**MOBILE SECURITY ZONE :**  
Automatic Control

**OUTSIDE :**  
Works Normally

### Why do you need MDM solution?

Device management is needed at work and school with the spread of BYOD

The risk of corporate and personal information leakage increased with Smart Work

To prevent data leakage when the device is lost or stolen with MDM solution

When the guest visits, MDM is needed for the access control and data security

### Applicable field

#### SCHOOL

- Control the smart device of the students in school
- manage school-owned smart devices
- Parents can manage their children's devices with parents app.

#### CORPORATION / PUBLIC OFFICE

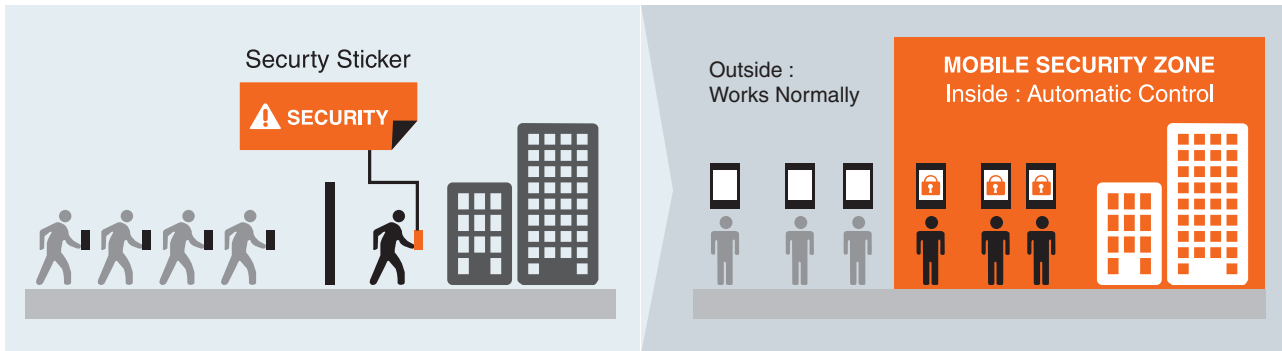

- Control the devices of employees(BYOD) during the work-hour
- Substitutions for Security sticker for visitors
- Protect critical information and data

#### MILITARY

- Manage and Control smart devices for training
- Control the smart device of the visitor and the staff who are in the military top secret area

# MAJOR FEATURE

## 1 DEVICE CONTROL BY ADMINISTRATOR

When the device enters the AP zone, the administrator can control it automatically.

## 2 LOST DEVICE MANAGEMENT

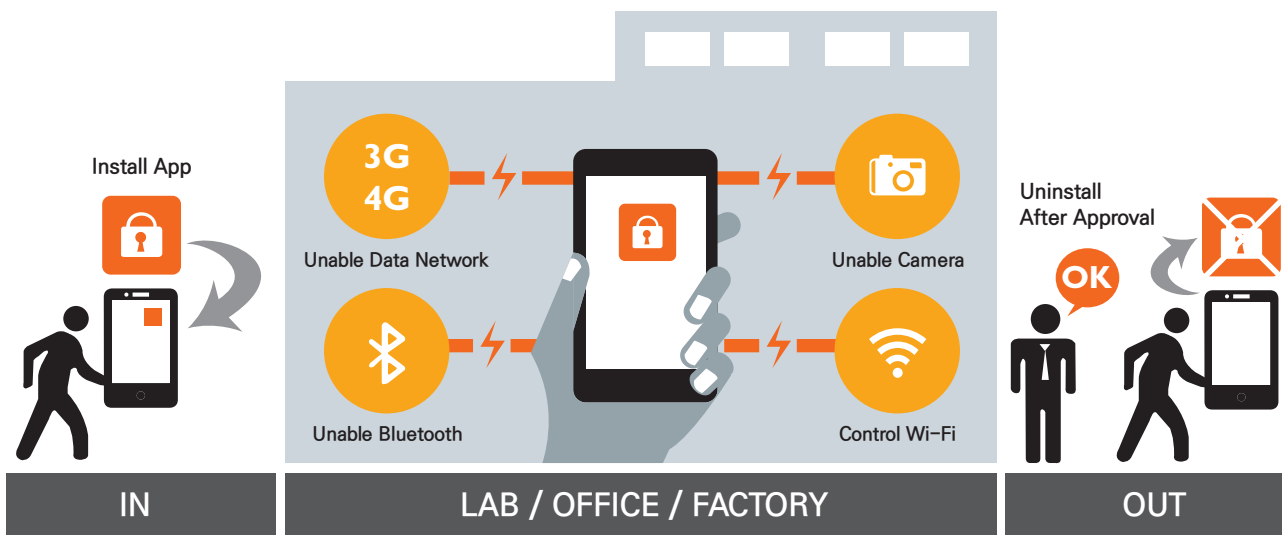

When the device is lost, PointLock MDM helps you to find the lost device and protect the data inside of the device with location tracking, siren, camera and device lock.

## 3 APPLICATION LOCK

With application lock, the manager can control the usage of the applications that are not allowed to use.

# Applied Case

Access Control for Visitors : To prevent data breach caused by smart devices and to control access of the visitor.
